Welcome!

Hello and welcome to Oxford! We're delighted to have you here for the *Rigour and Openness in 21st Century Science* conference.

Over the next two days we will hear from a host of incredible speakers, all here to think about how openness and digital innovation will transform science in Britain and worldwide.

We encourage everyone to participate actively, so most sessions have a panel period at the end for audience discussion with the speakers. You can tweet using #openoxford, and make sure to watch the website where further links and information may be posted.
